

ENGLISH

The goal of the Venture High School English team is to graduate students who are prepared for both college and future careers in the critical areas of reading, writing, speaking, and listening. Being prepared means being able to probe deeply and find meaning in both literary works as well as technical or informational works that are relevant to specific content areas. It also means learning to appreciate how a well written piece can make your life better.

It is important to note that the English team partners with other subject area teams to provide students with cross curricular opportunities to explore literacy, writing, and research. These opportunities are often integrated with learning expedition topics in the other subject areas.
